

SPRINT CHECKLIST

Ensure you have done all the following items for your Sprint presentation. Please **tick all boxes** under Self-Assessment for items completed.

Role	Item	Team Self-Assessment	Grader Assessment
Project Manager	Presented Cover Slide with Team Name, Project Name, and Client Name	☒	☐
	Presented with Team Members names, photos, and roles	☒	☐
	Presented slide with Project Objective , and one or two Objectives and Key Results (OKRs) (number, unit of measure, target value) which will be met by the current Minimal Viable Product (user story).	☒	☐
	Presented slide with Product Backlog (zoomed to be readable)	☒	☐
Requirements Analyst	Presented slide with clear Current Sprint Objective (Minimum Viable Product) , stated as one or more user stories in the format: "As a [usertype] I need to [do this] so that [we achieve this goal]".	☒	☐
Data Manager	Presented slide showing Entity Relationship Diagram (ERD) with full focal data table(s) that were focus of current sprint, or show full ERD, with current sprint data tables highlighted in yellow . Be sure to use standard ERD format and show table names, column names, data types, and relationship lines.	☒	☐
	Presented slide with realistic sample data used for the current sprint.	☒	☐
Process Designer	Presented slide with full CRUD matrix , highlighting with yellow shading process names for the current sprint and data tables for the current sprint, and CRUD annotation relevant process/data cells.	☒	☐
	Presented slide with full Data Flow Diagram , showing all stakeholders , and highlighting with yellow shading process names for the current sprint and data stores (data tables) for the current sprint, and data flow arrows labelled with attribute (field names).	☒	☐
UX Lead	Presented low- and high-fidelity mockups of all input/import interfaces for current sprint	☒	☐
Developer	Presented live demo / video recording of all functionality implemented for sprint: i.e. Minimum Viable Product [MVP] demo, showing the fully implemented User Story for this sprint.	☒	☐
	Provided public URL and necessary usernames and passwords (for all relevant user roles) to allow the MVP (User Story) to be tested by grader.	☒	☐
Process Designer	Presented any behind-the-scenes integrations / data flow triggers implemented for current sprint (e.g. condition/ action rules implemented in Zapier or automate.io), giving live demo and recorded video	☒	☐
Business Intelligence	Presented reports developed for this sprint, specifically reports that use the focal data tables for the current sprint . Ensure the reports are <i>useful, populated with significant volumes of realistic data, and accurate</i> .	☒	☐

SPRINT CHECKLIST

Analyst	For each report shown, presented specific management action examples that management could take based on report results.	☒	☐
Requirements Analyst	Presented description of test cases executed manually and automatically for current sprint, including status (pass/fail) of each test case, for both expected and unexpected realistic scenarios.	☒	☐
	Presented list of bugs needing repair in next sprint	☒	☐
Project Manager	Presented Next Sprint Objective (Minimum Viable Product)	☒	☐
COMMENTS: The team successfully completed all Sprint 1 design and implementation objectives. Each role delivered the required artifacts aligned with the Sprint 1 MVP user story for student peer evaluation submission. Design work was completed early, which allowed implementation to proceed without blockers. Tasks were clearly assigned and tracked, and team members communicated progress regularly. Minor follow-up items include final proofreading, cleanup, and preparation for presentation, but no core Sprint 1 requirements remain incomplete. [Add grader comments here.]
